

Berner & Mattner complies with ISO/IEC 27001:2005

Certificate ensures Information Security

Munich, June 29, 2010 – Berner & Mattner Systemtechnik GmbH has been awarded the ISO/IEC 27001:2005 certificate by DQS (Deutsche Gesellschaft zur Zertifizierung von Managementsystemen). The certificate documents an independent audit of management processes performed by this external body of accredited assessors and demonstrates customers that information security and seamless business continuity are of particular importance to Berner & Mattner. In particular ensures the ISO 27001 certificate the protection of the customers' intellectual property throughout all company levels.

As a result of an independent audit Berner & Mattner Systemtechnik GmbH obtained the ISO/IEC 27001:2005 certification from DQS on June 24, 2010 – in addition to the ISO 9001 certification, which the company has already held since 1996.

Guarantee for accredited information security and protection of intellectual property

The certification, awarded by external accredited assessors, guarantees that Berner & Mattner applies mature and legally compliant management processes as well as control mechanisms to meet its customers' requirements in terms of protecting intellectual property and business continuity. Future re-audits by independent auditors shall renew this guarantee.

"As a responsible development partner for highly specialized technology companies we take information security and the protection of our customers' intellectual property very seriously", explains Ingo Braeuer, quality manager at Berner & Mattner, to corroborate the company's decision. "The ISO 27001 certification gives our customers the assurance that we meet this requirement and have implemented it in our company".

About Berner & Mattner

Berner and Mattner Systemtechnik GmbH is specialized in custom-made solutions for the specification, development and testing of complex electronic systems. Its competence spectrum ranges from consulting, conception, software and systems development to the setup and operation of entire test and integration systems.

On the basis of its products and services, Berner & Mattner provides customized software and engineering solutions for the automotive, aerospace, industrial automation, transportation, and defence industries. By means of its integrated model-based approach, Berner and Mattner optimizes its customers' efficiency and quality in software and systems development. This is why well-known companies such as Audi, BMW, Daimler, Deutsche Bahn, EADS Germany and Siemens have been placing their trust in Berner and Mattner for many years. The privately owned company, with headquarters in Munich, was founded in 1979, currently employs 270 people at 8 sites in Germany and Austria and has been named a "Bavaria's best 50 for 2009" company.
